

## Apprenticeships - Data Publication March 2022

The Data Publication includes several figures which will enable the Government, the public, and wider stakeholders to understand each body's headcount and the number of apprentices they employ, and then use that information to assess the progress a body has made towards meeting the target.

The information required is:

<b>Figure A:</b> The number of employees whose employment in England by the body began in the reporting period.
63
<b>Figure B:</b> The number of apprentices employed by the body whose apprenticeship agreements began in the period. <ul style="list-style-type: none"> <li>• This includes employees who were already working for the body before beginning their apprenticeship, as well as new apprentice hires</li> </ul>
0
<b>Figure C:</b> the number of employees employed in England that the body has at the end of the period.
337
<b>Figure D:</b> the number of apprentices who work for the body at the end of the period.
2
Public bodies are also required to provide two percentages in order to give context to the other figures. These percentages do not reflect the progress a public body has made towards the target:
<b>Figure E:</b> Figure B expressed as a percentage of figure A.
0%
<b>Figure F:</b> Figure D expressed as a percentage of figure C.
0.59%
<b>Public bodies must also provide:</b>
<b>Figure G:</b> The number of apprentices who worked for the body immediately before the period.
2
In addition, the Apprenticeship Activity Return (Return Section 2) requires public bodies to send the following figures, which will help identify their progress towards meeting the target, to the Department for Education. Public bodies could also consider providing these figures in the Data Publication:
<b>Figure H:</b> Headcount on 31 March 2022; and
337
<b>Figure I:</b> Figure B expressed as a percentage of figure H
